

SEIKADA

Send money to your loved ones,
anywhere in the world,
instantly

**International Remittances are
slow and expensive**

Limited Banking hours
for traditional finance

High SWIFT and Wire fees (~6%)

Seikada uses

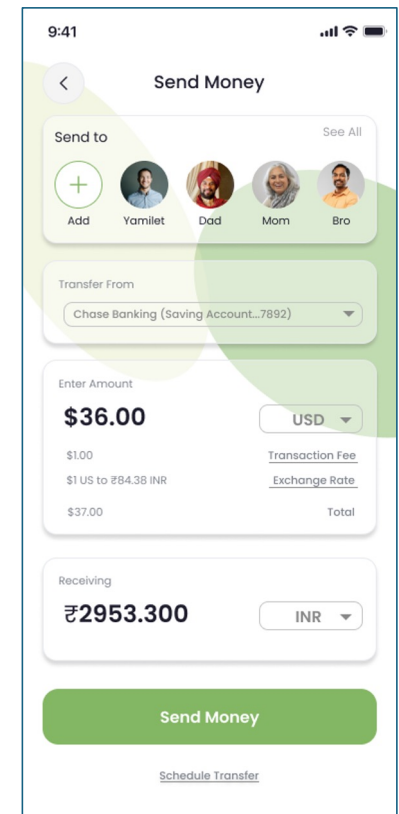

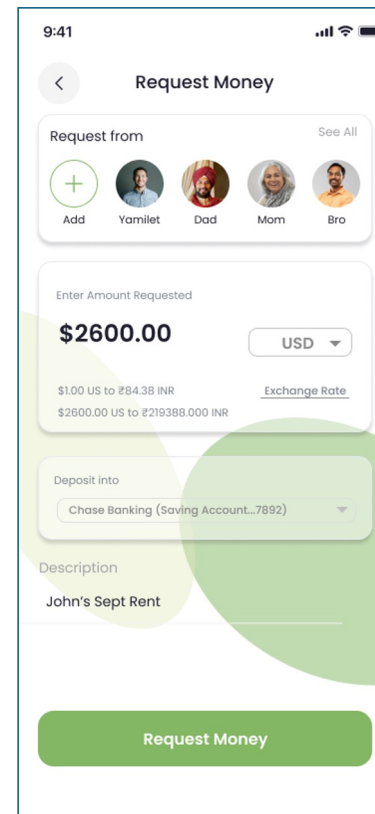

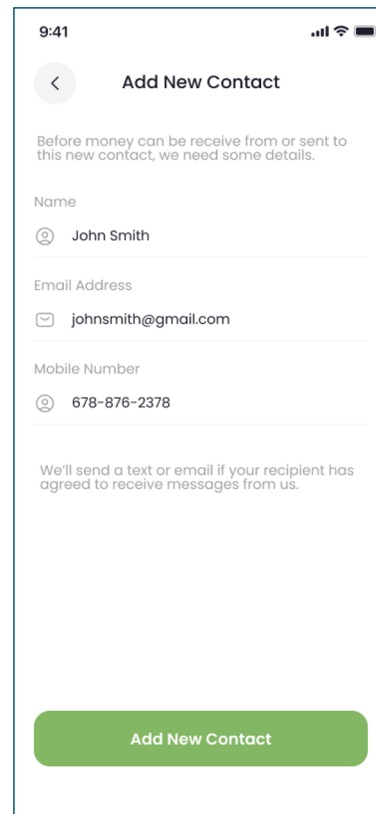

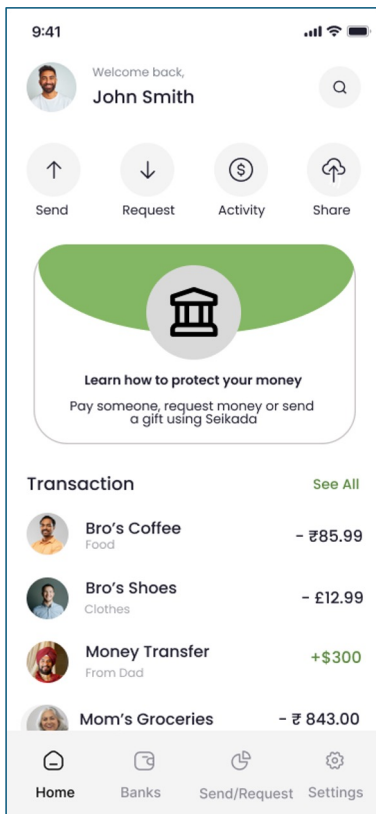

USDC Stablecoins

and

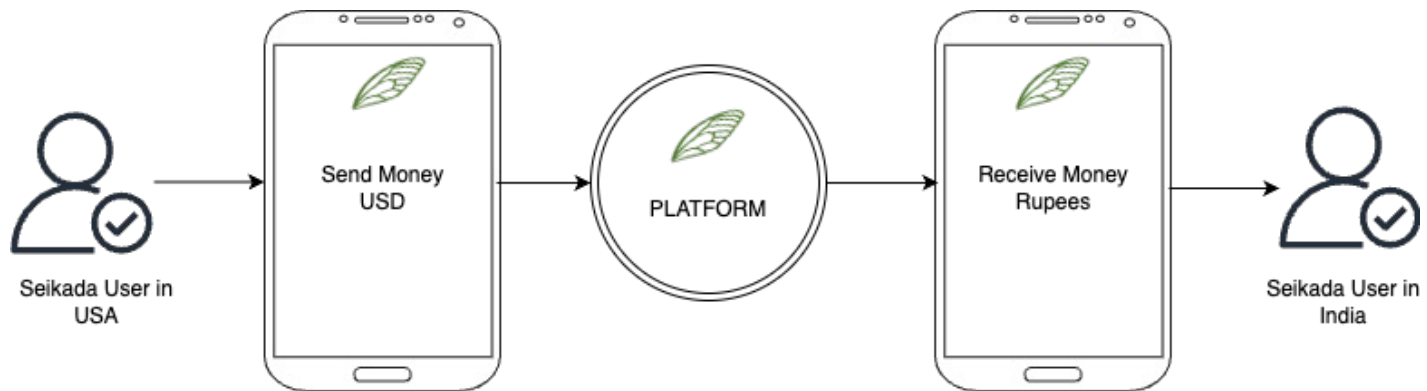

Real Time payments (RTP)

without the hassle of managing **wallets** and understanding complicated cryptocurrencies

Seikada App Prototype Wireframe

Seikada Workflow

Sender and Receiver **securely onboard** to Seikada

Seikada's Platform facilitates the **end-to-end** transfer

Sender and Receiver connect their **bank accounts**

Total Market for Cross-border Remittances

\$3.3T

By 2030^[1]
for C2C^[2] market

With Revenue of

\$12.3B

[2] C2C: Consumer to Consumer

Targeted Customers

International Students

(1MM in US, 6.4MM WW) with ~5% YoY growth

- Hard for international students to get student loans in US
- Not all international students get grants or full scholarships
- No/Low fees on international transfers means students receive more tuition
- First phase target market: India
- Next phase: Vietnam, Philippines, Brazil, Canada, Australia

Revenue Model

- Free signups
- Monthly and Yearly subscription fee
- Different flat fee for different amounts ranges for one-time transfers
